

Part 1: Individual Cloud API

API Name:

Run Analysis API

Purpose:

This API processes user-submitted content (text or URL) and uses Azure OpenAI to determine whether the content is real or fake. It generates a credibility score and summary explanation.

Method: (Test in Postman)

POST

Cloud Endpoint:

<https://verifyai-backend.azurewebsites.net/api/runanalysis>

Cloud Service:

Microsoft Azure

- Azure Functions (API hosting)
- Azure OpenAI (AI processing)
- Azure PostgreSQL (database storage)

Input:

```
{  
  "submission_id": "uuid"  
}
```

Output:

```
{  
  "analysis_id": "uuid"  
}
```

Related Module:

Analysis Module

Related Database Tables:

- analysis_runs

- submissions
- text_submissions
- url_submissions

Part 2: Team Cloud APIs

API 1: Run Analysis API

- Performs AI-based content verification
- Stores results in the database
- Uses Azure OpenAI

API 2: Submit Text API

Purpose:

Allows users to submit text content for analysis.

Method:

POST

Cloud Service:

Azure Functions + PostgreSQL

Input:

```
{  
  "user_id": "uuid",  
  "text": "Sample news content"  
}
```

Output:

```
{  
  "submission_id": "uuid"  
}
```

Related Module:

Submission Module

Related Database Tables:

- text_submissions

Part 3: Request & Response

Run Analysis API

Sample Request

```
{  
  "submission_id": "123e4567-e89b"  
}
```

Sample Response

```
{  
  "analysis_id": "789e1234-e89b"  
}
```

Error Case 1 – Missing Input

```
{  
  "error": "submission_id is required"  
}
```

Error Case 2 – Submission Not Found

```
{  
  "error": "Submission not found"  
}
```

Submit Text API

Sample Request

```
{  
  "user_id": "123",  
  "text": "Aliens landed in California."  
}
```

Sample Response

```
{  
  "submission_id": "456"  
}
```

Error Case 1 – Missing Text

```
{  
  "error": "Text is required"  
}
```

Error Case 2 – Invalid User ID

```
{  
  "error": "User not found"  
}
```
